Ribhav

EDUCATION

Indian Institute of Information Technology, Allahabad

B.Tech in Electronics and Communication Engineering

Dec 2021 – Jul 2025

CGPA: 8.55

EXPERIENCE

Software Development Engineer, PhonePe

Jul 2025 – Present

- Implemented passkeys authentication in PhonePe for secure, passwordless user logins.
- Revamped the PhonePe Profile Page to enhance UI/UX, modularize components, and reduce tech debt.
- Migrated the iOS codebase from CocoaPods to Swift Package Manager (SPM), resulting in faster build times and reduced app size.

Software Developer Intern, PhonePe

Jan 2025 – Jun 2025

- Improved scalability of the payment platform by optimizing microservices and reducing network call latency.

PERSONAL PROJECTS

MeetingMind — AI Meeting Assistant

Mar 2026 – June 2026

Swift, SwiftData, Python, FastAPI, Whisper, Gemini, Claude, Apple MLX (Mistral-7B), RAG, GraphRAG, SQLite

- Built an **iOS app + Chrome extension** (Manifest V3) meeting assistant — iOS handles live mic transcription in **20+ languages** while the extension captures Google Meet audio via **tabCapture/offscreen documents**; both feed a shared **FastAPI + SQLite** backend with LLM summarization, hybrid action-item extraction (LLM + Apple NER + rule-based), and one-tap calendar export.
- Implemented a full **RAG pipeline** (chunking → embeddings → vector store → cosine retrieval → grounded answers) with on-device **TF-IDF fallback**; engineered **GraphRAG** over a **9-entity/9-relation** knowledge graph (BFS, community detection, PageRank) for cross-meeting Q&A.
- Shipped **4 insight engines** (Meeting DNA, commitment-drift, contradiction detection, AI critique) each with an on-device fallback; deployed a **mobile-friendly live dashboard** with an in-meeting overlay for real-time intelligence.
- Designed a **dual-engine architecture** (rule-based \$0 Demo Mode + AI Mode) shared across iOS and Chrome clients, orchestrating **4 LLM/ASR backends** (Gemini, Claude, Whisper, Mistral-7B via MLX) with per-call failover and **map-reduce summarization** for long meetings.

House Price Prediction

Apr 2024 – May 2024

Python, Scikit-learn, Pandas, Flask, AWS, HTML/CSS/JavaScript

- Built a Bangalore house price model with **92% accuracy**; applied feature engineering, outlier removal, and dimensionality reduction on **1,000+ listings**.
- Tuned regression models with **GridSearchCV** and k-fold cross-validation; deployed on **AWS** via Flask REST API with a responsive frontend for real-time predictions.

Easy Food Recipes

Oct 2023 – Nov 2023

Kotlin, MVVM, Room, Retrofit, LiveData, ViewModel

- Developed an Android app with **50+ meal recipes** and video instructions; architected with **MVVM** for clean separation of UI and business logic.
- Integrated REST APIs via Retrofit with **Room offline caching** and LiveData-driven reactive UI for seamless browsing without network connectivity.

TECHNICAL SKILLS AND INTERESTS

Languages: C/C++, Swift, Kotlin, Python, SQL, Javascript, HTML, CSS

AI/ML: RAG, GraphRAG, LLM Orchestration & Prompt Engineering, Whisper (ASR), Embeddings & Vector Search, On-device ML (Apple MLX), Scikit-learn

Frameworks & Tools: SwiftUI, SwiftData, FastAPI, Flask, Retrofit, Room, Xcode, Android Studio, Postman, VS Code

Cloud/Databases: AWS, MySQL, SQLite, Firebase **Coursework:** Data Structures & Algorithms, Operating Systems, OOP

ACHIEVEMENTS

- Global Rank 1** in Techquezt Contest #8 (AI/ML); **Rank 2** in C-Fresh 2022 Competitive Programming contest, Aparoksha, IIITA.
- LeetCode Knight** (rating **1987**) — ranks **777/30k+**, **1225/37k+**, **1292/37k+** in Biweekly 101, 133 and Weekly 402.
- Codeforces Specialist** (rating **1401**) — ranks **1726/30k+**, **2126/30k+**, **2441/30k+** in Div 3 R839, Div 2 R876, Div 2 R860.
- Solved **1600+** problems across coding platforms; **AIR 9139** out of 900k+ candidates in JEE Main 2021.
